**Initiative Pathways de Future Earth****Pathways Forum****Communicating 'messy' science**

How does communication and outreach in transdisciplinary settings differ from traditional research? How do we navigate issues of transparency, objectivity, and inclusivity? What makes communication "effective", and what methods/tools can support this? This webinar asks panelists (including previous awardees of the Pathways Communication Grants) and participants to draw from their experiences to reflect on the challenges and opportunities for communication and outreach in transdisciplinary contexts. By anchoring this discussion with concrete examples, this session seeks to support researchers wishing to engage more meaningfully with different actors, test new methods of communication, and go beyond the linear model of science communication to enact transformative change.

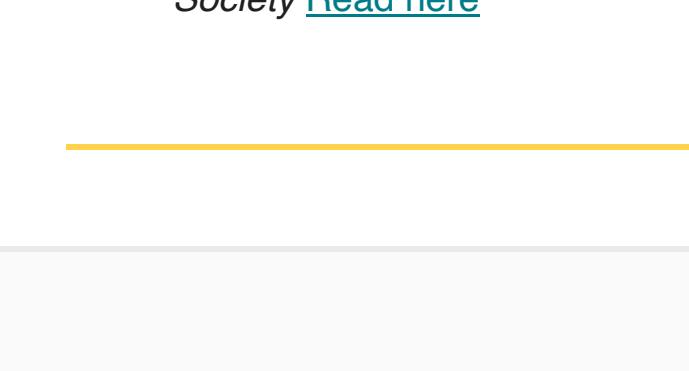

**Panelists:**[Kiah Smith](#), University of Queensland[Ignacio Gianelli](#), University of Santiago de Compostela[Mélina Macouin](#), French National Centre for Scientific Research[Juan Francisco Salazar](#), Western Sydney University[Register now](#)**Débat****AOC**[Guillaume Blanc: Pour des enseignements systémiques sur les enjeux écologiques dans le supérieur](#)[Matthias Schmelzer: Changing to an electric car isn't enough](#)[Julia Wittmayer, Mayte Beekman and Kristina Bogner: Explains why brave spaces in universities for reflection, \(un\)learning, confrontation, and collective sensemaking are key to making positive societal impact](#)[Climate Home News: The Overshoot Commission is talking about solar geoengineering. Not everyone thinks it should](#)**Évènements**

Le 1er webinaire Enseignement Cours sur le numérique par Emmanuelle Frenoux, Anne-Laure Ligozat et Guillaume Urvoy-Keller aura lieu **14 juin 2023 de 15h à 17h30**

The Law and Political Economy (LPE) in Europe Network invites applications for its first Summer Academy at Erasmus University Rotterdam. LPE in Europe is a movement of legal scholarship and praxis that seeks to show how law contributes to the social, economic, and ecological crises that we face, and how it could become a tool in addressing them.

They particularly encourage applications from researchers at the **doctoral** and **early career** stages.

Human Frontier Science Program (HFSP) and its partners will offer two free events in Paris spanning three days from 27-29 June 2023. The umbrella title for the combined events is: "Fundamental Life Science meets Climate, Environment and Sustainability: new bridges, new partnerships, new opportunities."

Call for Post-doctoral and PhD positions: University of Freiburg, Germany.  
RestPoll is a highly transdisciplinary project aiming to provide society with tools to reverse wild pollinator declines and to position Europe as a global leader in pollinator restoration. RestPoll will, together with stakeholders ranging from individual land managers to governments, co-design, evaluate, and refine measures and cross-sectoral approaches to restore pollinators and their services.
